

Carlsbad, N. M.
July 23, 1934

Dear Mr Anderson:

Thank you many times over for the shells which I shall get off to Baker very soon. We may have to wait awhile for a reply as I wouldn't be at all surprised if he is now on his vacation. As soon as I hear, however, I shall let you know.

The identification of the egg shell may prove difficult if not impossible. I shall do my best with it, but it may have to wait until I return east.

Am I correct in assuming that these shells do not appear in the sand, but in the bottoms of the blowouts where the earthen soil is exposed? It seems to me that that was the drift of our conversation that day but I should like to make sure. Hopping about over the country this way and trying to keep various areas in mind is becoming quite a task.

My address here is 40 Carlsbad Sheet Metal Co., Carlsbad, N. M. We are up in the hills working on a cave. We've gotten some Basket Maker remains and are just working into the lower levels. So far nothing startling has appeared.

Please give my best wishes

to Harold and again my thanks to you all.

Cordially,

Loren Eiseley
